

TestGPT Sample Input

User Story

User Story 1 ? View Order History

As a registered customer,

I want to view my past orders with status and delivery date,

So that I can track purchases and reorder items.

Acceptance criteria:

- Order list shows order ID, date, status (Pending, Shipped, Delivered, Cancelled), and total amount
- Most recent orders appear first
- Empty state shows "You have no orders yet" with a link to the catalog
- Cancelled orders display the cancellation reason when provided

User Story 2 ? Cancel Pending Order

As a registered customer,

I want to cancel an order that has not yet shipped,

So that I am not charged for items I no longer need.

Acceptance criteria:

- Cancel is available only when order status is Pending
- User must confirm cancellation in a dialog
- After cancellation, status changes to Cancelled and a confirmation email is sent
- Refund is initiated within 24 hours for prepaid orders
- Attempting to cancel a Shipped order shows "This order can no longer be cancelled"

User Story 3 ? Reorder from History

As a registered customer,

I want to add all items from a previous order to my cart,

So that I can quickly repeat a purchase.

Acceptance criteria:

- "Reorder" button is visible on each order detail page
- Unavailable or discontinued products are skipped with a warning listing skipped items
- Available items are added with the same quantities as the original order when still in stock
